THE TITLE OF YOUR THESIS OR DISSERTATION GOES AT THIS MARGIN

by

FIRSTNAME LASTNAME

(Under the Direction of Major Professor’s Name)

ABSTRACT

This is the format for the abstract for your paper. This portion of your document goes at the very beginning of your thesis or dissertation. It is neither counted nor numbered as a page. The abstract should not exceed 350 words. Index words are key words or phrases used in your paper that would enable a person to successfully search out your document in a library or an Internet search engine. Be sure to indent your index words, following the format below.

INDEX WORDS: Index term, Dissertation, Thesis guidelines, College of Graduate Studies, Student, Graduate degree, Georgia Southern University

Note: Index Words are terms one is likely to use in conducting a search on a manuscript on your subject. Index words should appear as illustrated above, but not necessarily include these words. Words used here are for example only.

Your document must be written in Times New Roman font in the size and manner used in this template. Submissions provided in fonts other than Times New Roman will be returned for you to revise and resubmit.
THE TITLE OF YOUR DOCUMENT BELONGS HERE

CHAPTER 1

INTRODUCTION

Purpose of the Study

This study seeks to understand the reasons why there is such a large quantity of stress associated with the pursuance of a terminal academic degree. It is widely known that most graduate students report high levels of stress on the Academic Stress Index, especially in the first year of study. The author here has conducted research that hopes to explain the particular sources of this stress, reasons that the levels of stress seems amplified, and numerous ways to alleviate the stress. One very successful avenue for stress relief has been the Exercise Method coupled with preventative measures in the final stages of writing the long-awaited dissertation. It is the belief of the author that the findings of this study will provide future students with effective and solid stress relief.

*How This Study Is Original*

The present study deals with a particular age level in the range of 22 to 35. The author assumed that the largest majority of graduate students fell into this age range and that many other life stressors occurred during this period of the normal human life-span. Each of the participants in the study completed a permission form and was evaluated by a medical professional to ensure overall physical and mental health both before and after the research was conducted. The participants were paid for their time by the researcher and were debriefed immediately following the study. All of the participants were enrolled as full time students and were doing research to support their dissertation.
Here is a landscape with page numbers in the correct place for viewing on the screen. Note that, if the thesis or dissertation is printed and bound, the page number may disappear into the binding.
